## MGIMS CLASSROOM: OUR LEARNING MANAGEMENT SYSTEM

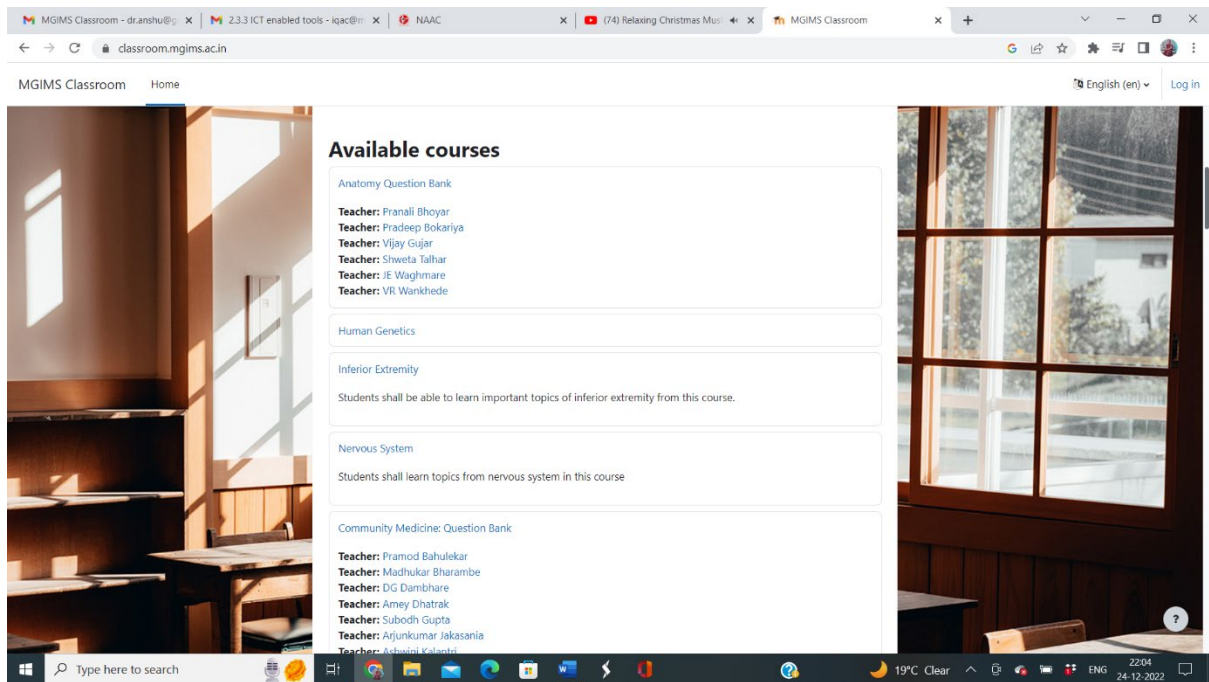

**MGIMS Classroom**

The web-based MGIMS Classroom is an initiative to enhance the learning experience of students at Mahatma Gandhi Institute of Medical Sciences, Sevagram utilizing the immense potential of information technology. MGIMS Classroom offers interactive online classes developed by eminent teachers at MGIMS, Sevagram to support the classroom, clinical and community-based teaching of students.

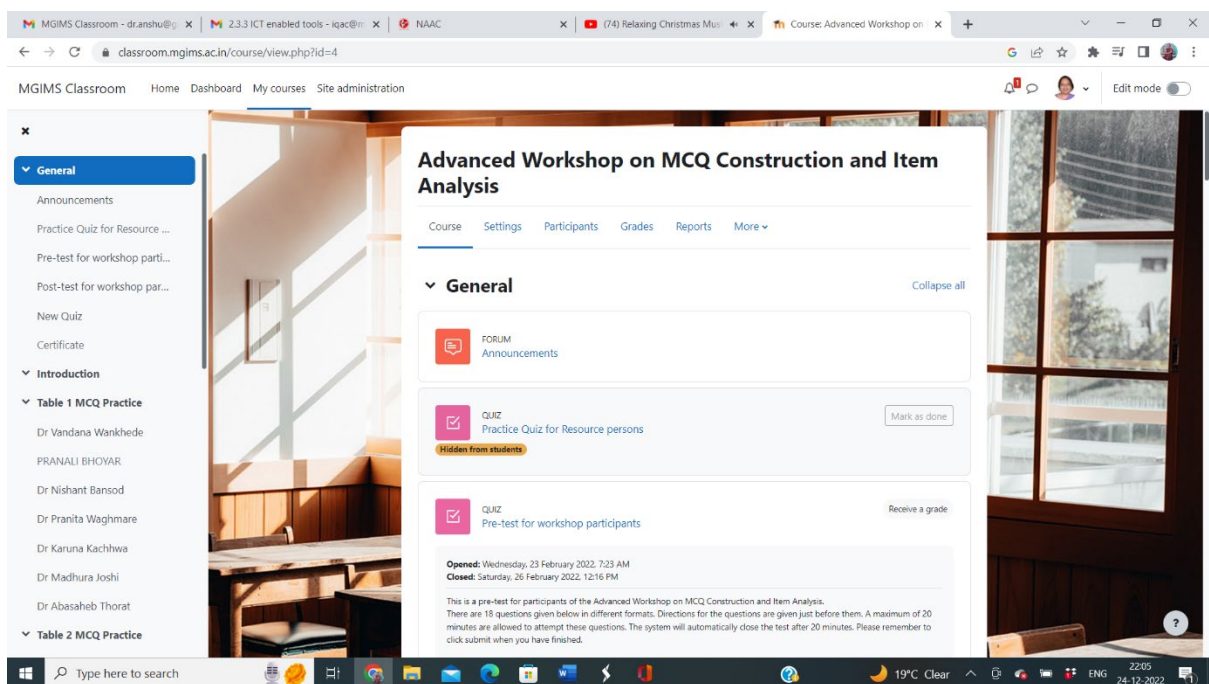

For more information regarding Mahatma Gandhi Institute of Medical Sciences at Sevagram, [click here](#).

**Available courses**

MGIMS uses MOODLE, a free and open-source learning management system (LMS), to create and manage online courses and activities. We have hosted the same as MGIMS Classroom. It is designed to support a wide range of teaching and learning activities, including self-paced courses, live and recorded lectures, discussion forums, quizzes, assignments, and more. This platform gives us the ability of creating courses for our students. This helps us create engaging and interactive online courses, including the ability to upload and share multimedia content, create interactive quizzes and assignments, and facilitate discussions and collaboration among students. This platform is hosted on our servers and connected to internet which makes it accessible from anywhere in the world.

We have defined a course creator in every department who can start new courses for them. This provides each department the freedom to create courses as they see fit. These courses created by our faculty supplement and add value to the physical classes. Courses are also available for faculty development activities, workshops, postgraduate teaching, camps etc.

All the students of MGIMS are enrolled to the platform at the time of admission and are permitted to access appropriate courses. Students are given additional resources, MCQ tests here. Students also use MGIMS Classroom during camps to access camp resources, collect data and collaborate.
