

Feedback from parents

Your occupation

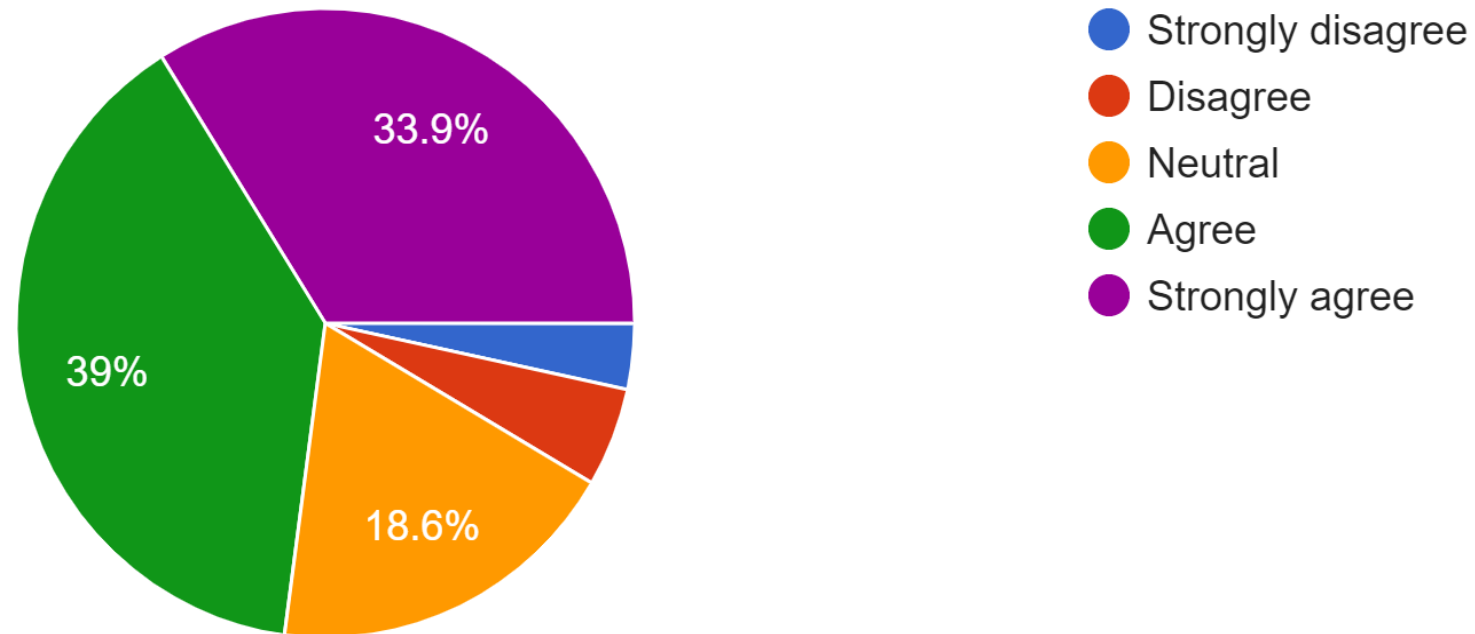

Perceptions and selection process

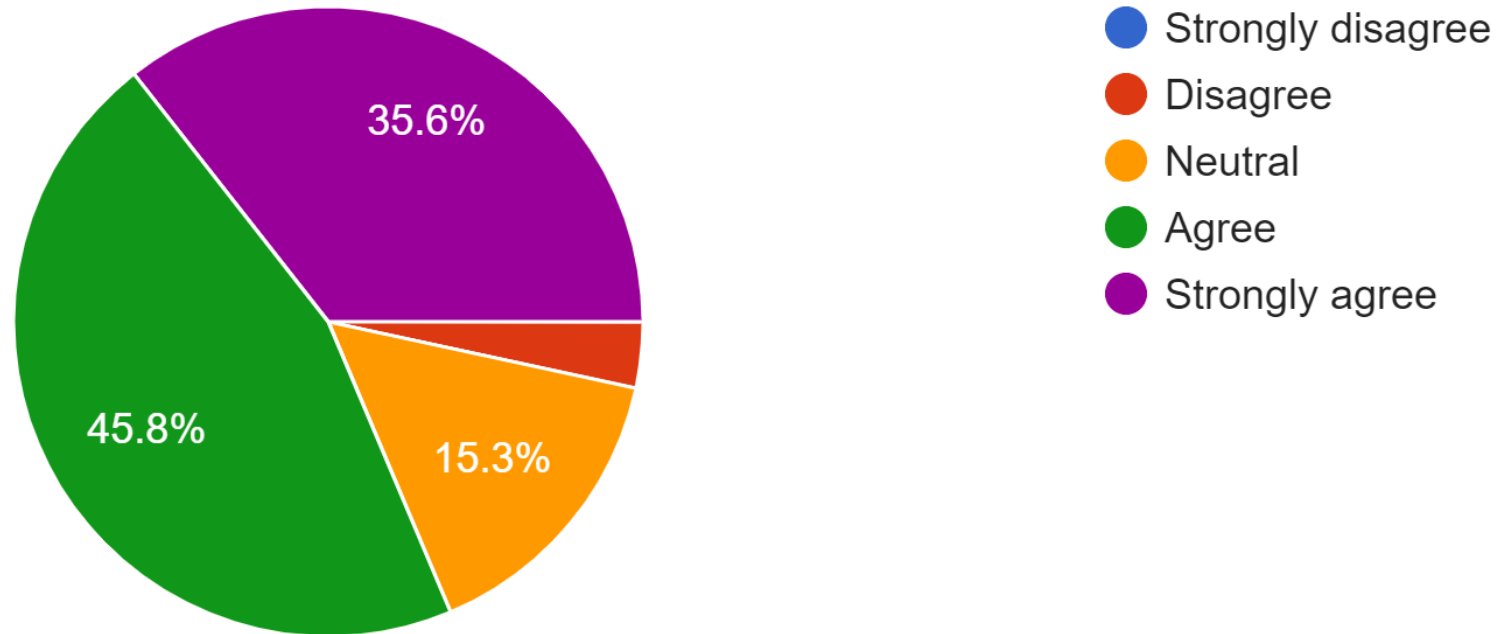

The year in which your child first secured admission in MGIMS

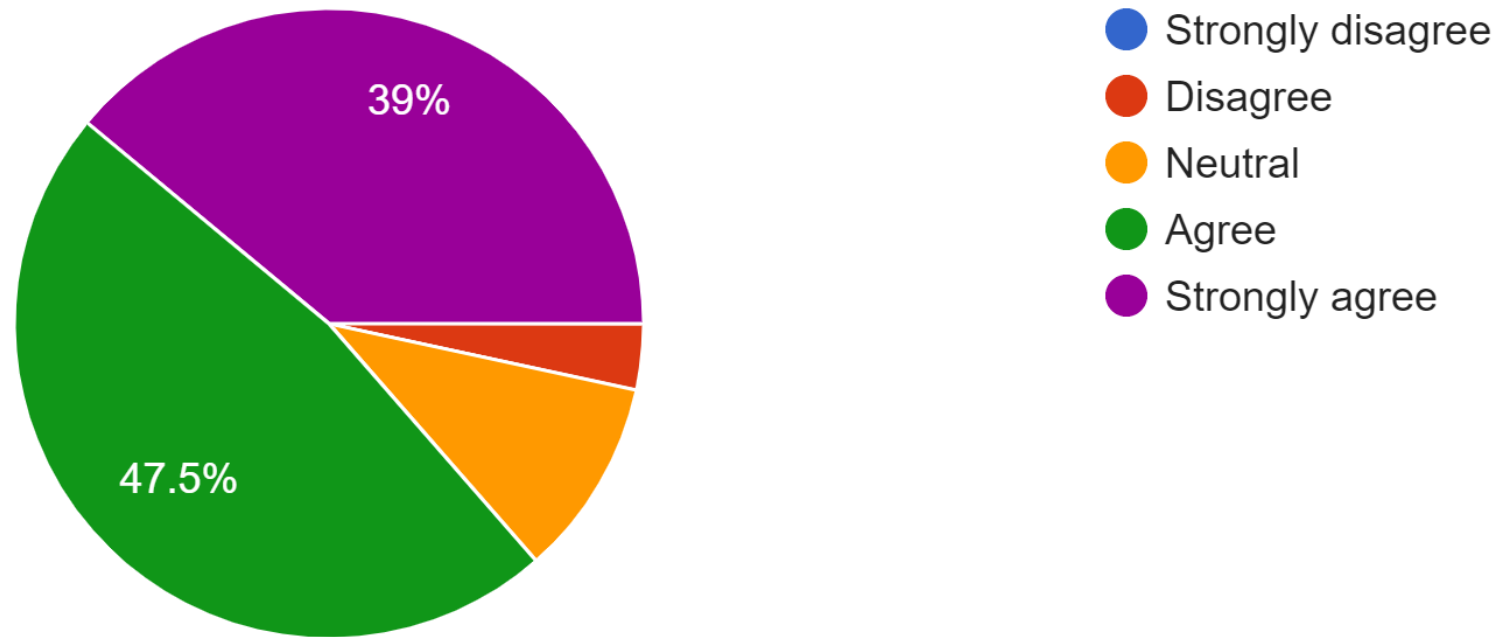

I had heard of MGIMS Sevagram before seeking admission here

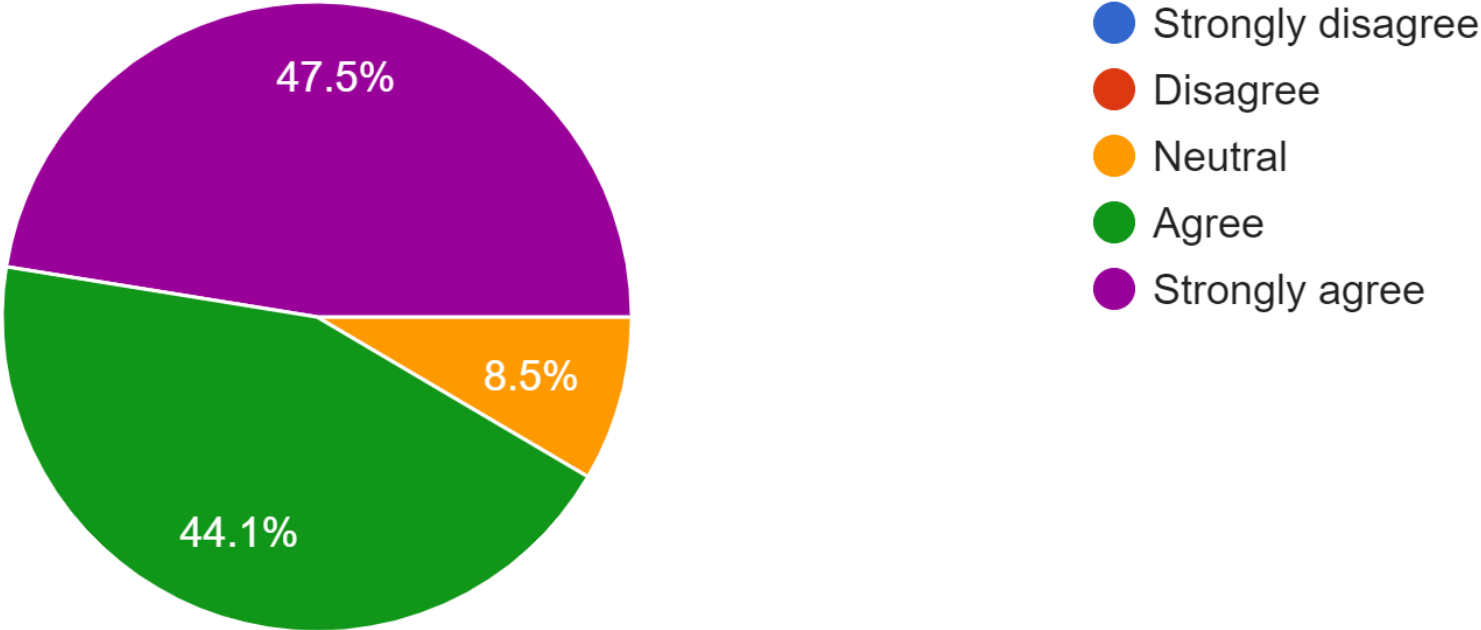

MGIMS ranks among the best medical colleges in the country

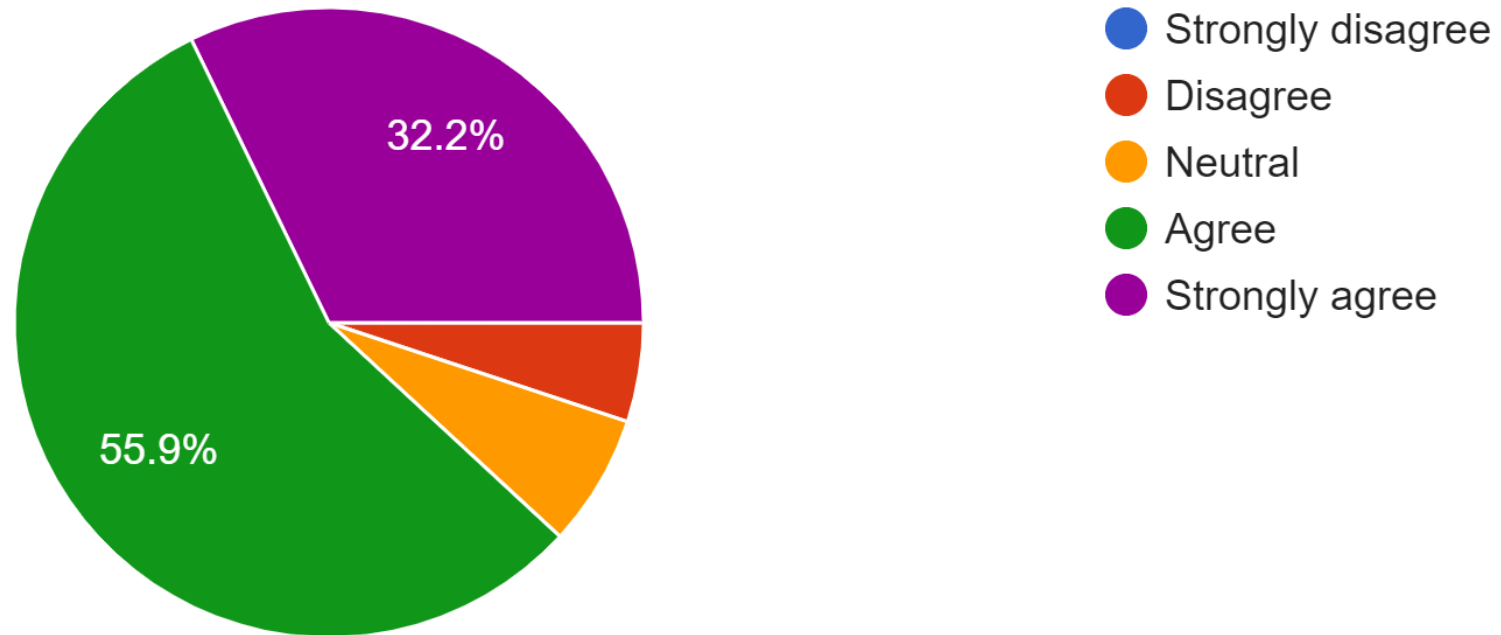

Getting admission in MGIMS for my ward is a matter of pride for me.

The admission process to the Institute is transparent.

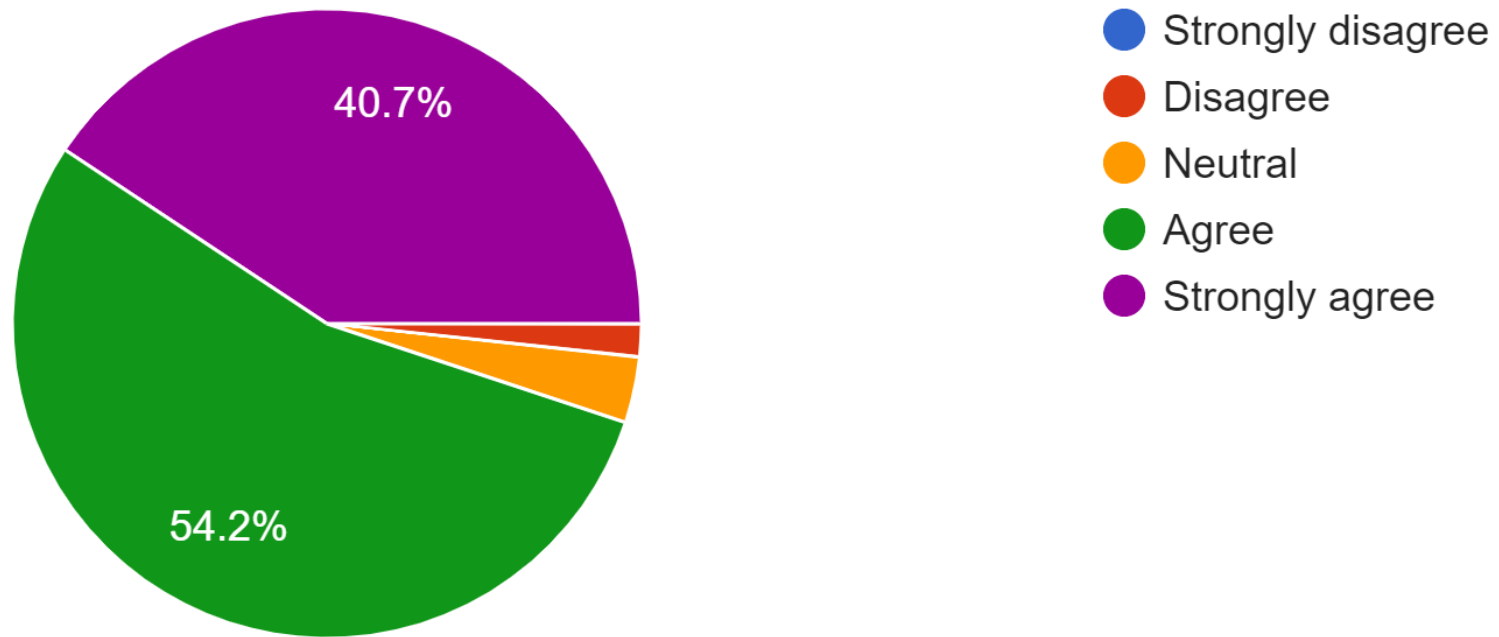

Information about the Institute is easily available to all.

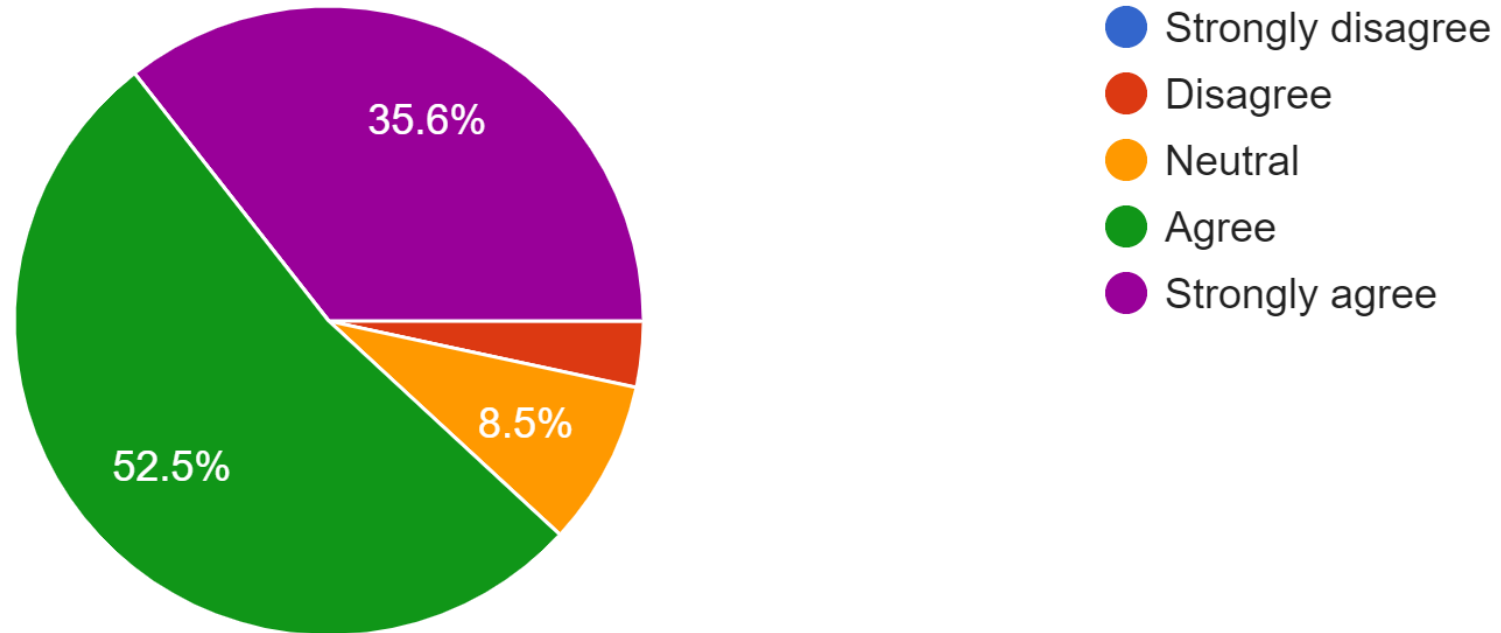

Academic environment at MGIMS

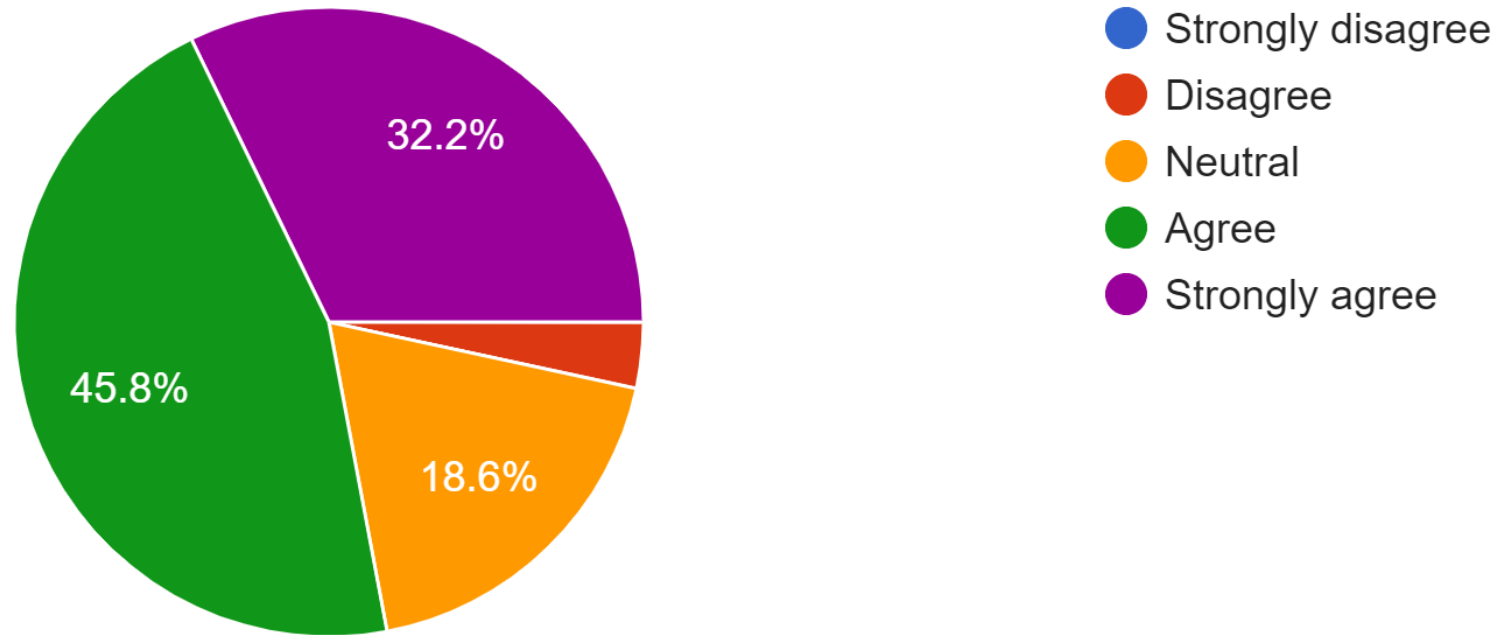

The discipline in the Institute is good.

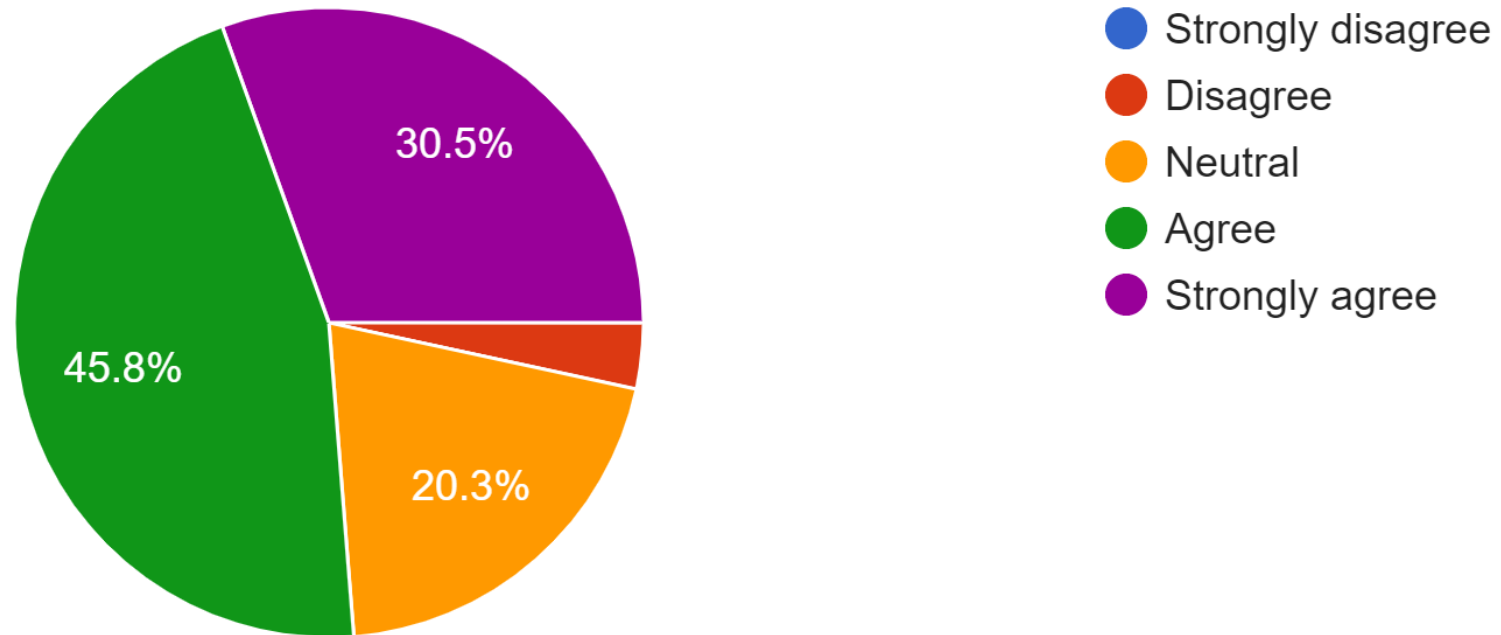

The atmosphere in the Institute is conducive for learning.

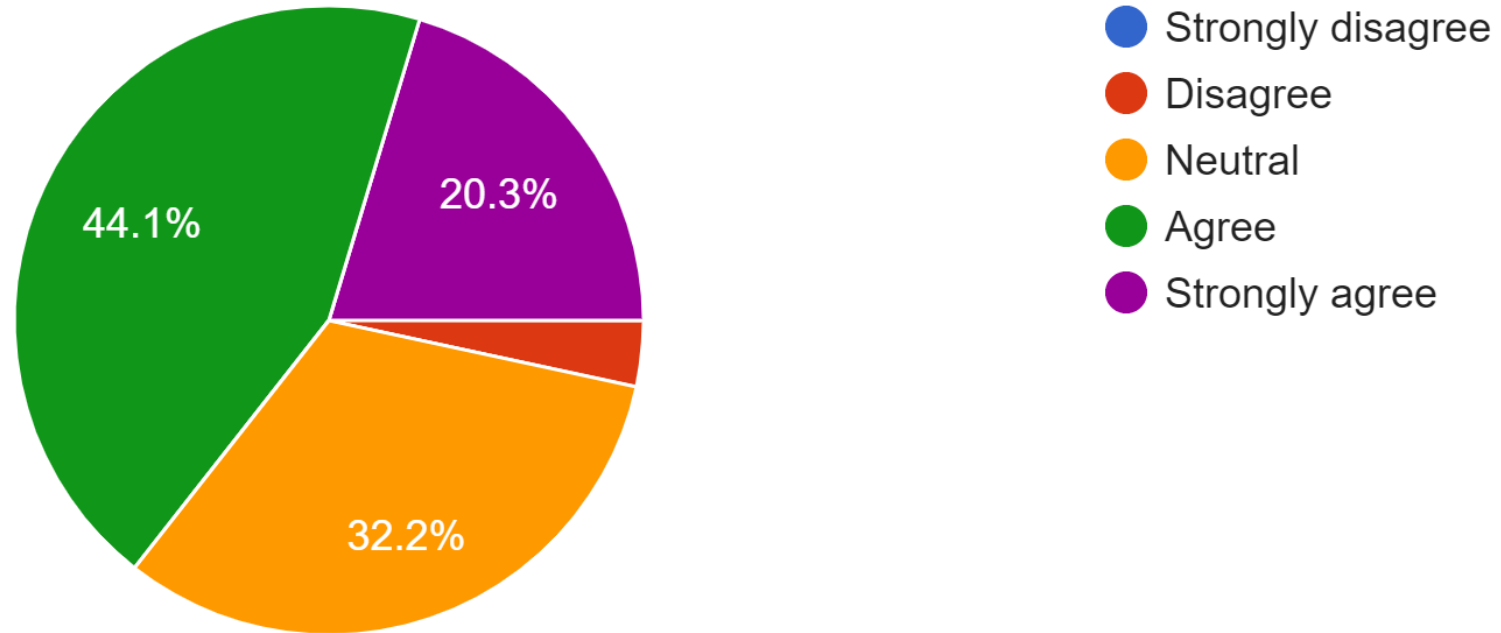

The curriculum of the course is well designed and provides learning experience to the students.

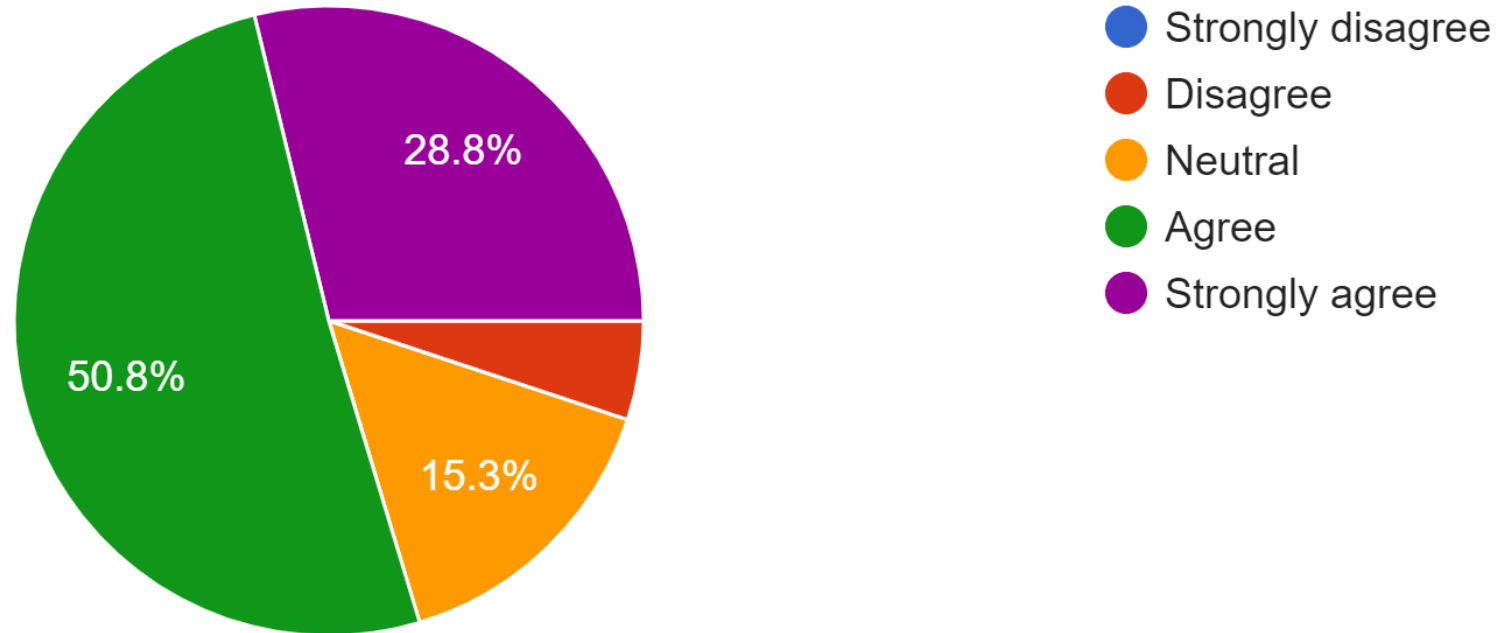

The curriculum incorporates recent advances in medicine

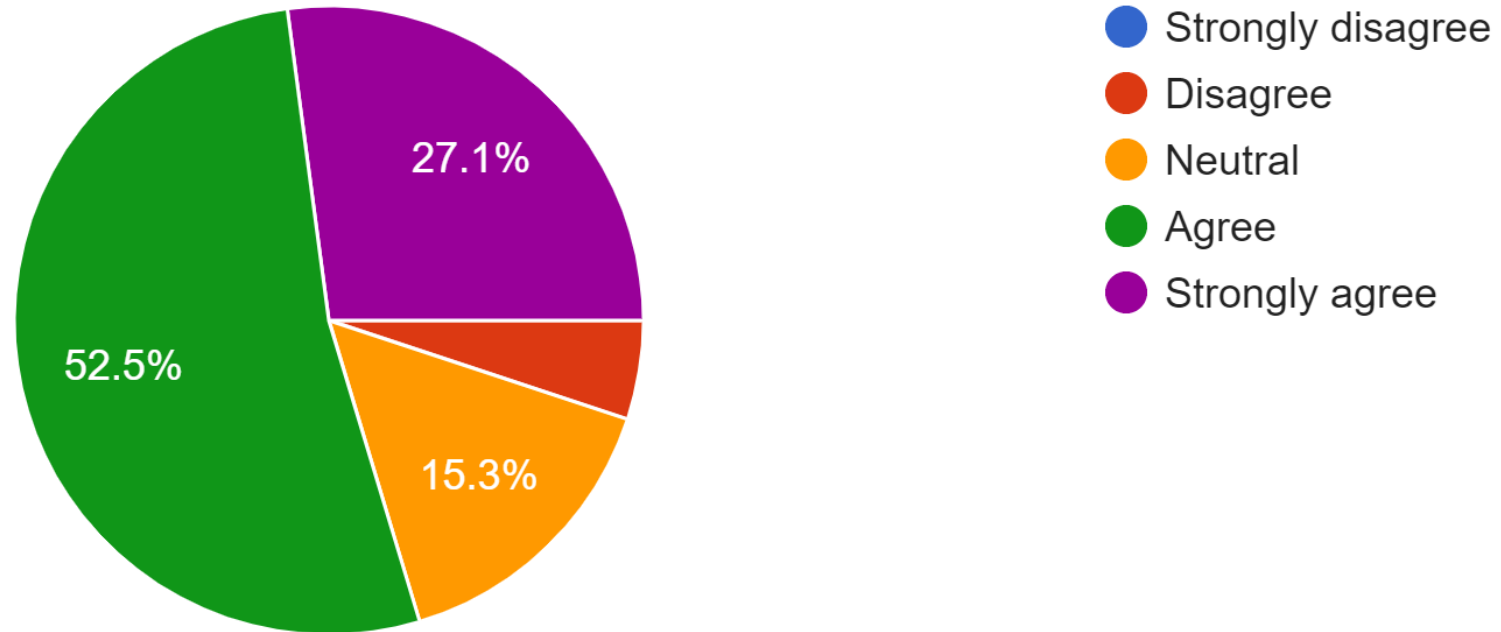

Employability is given focus in the curriculum design.

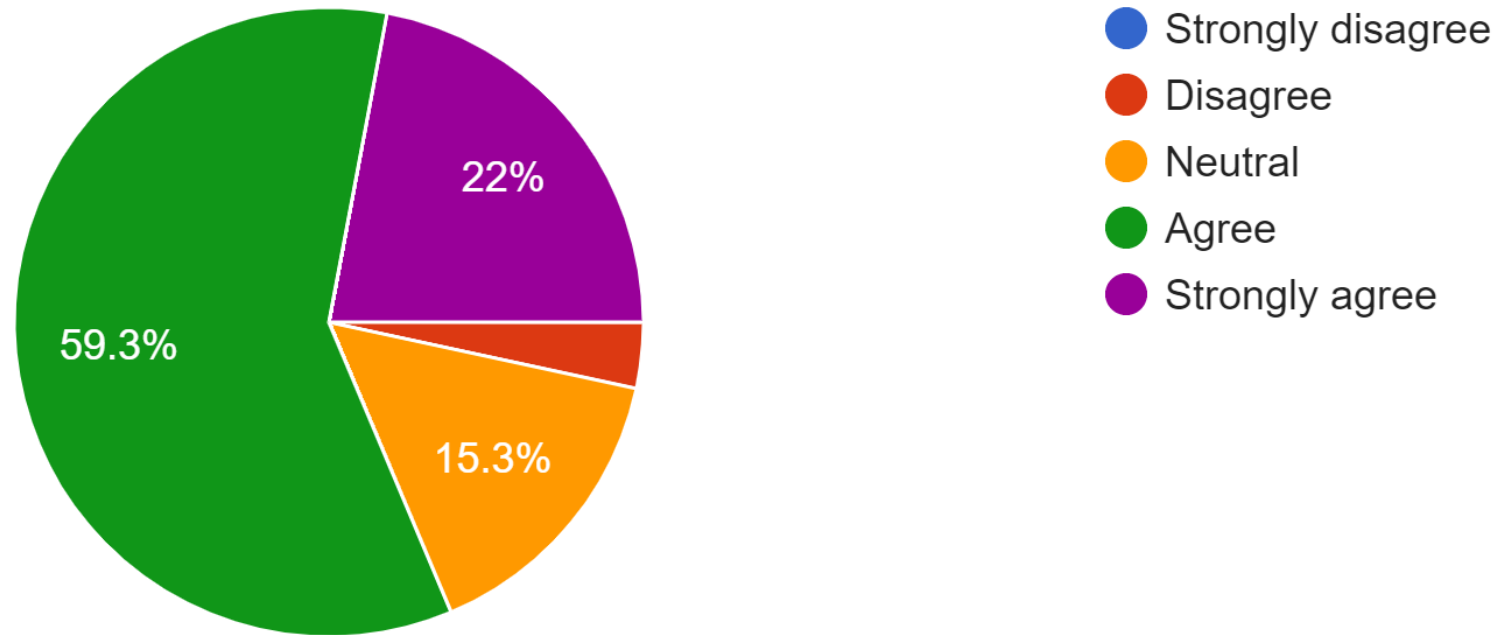

The Institute provides opportunities for students to interact with teachers

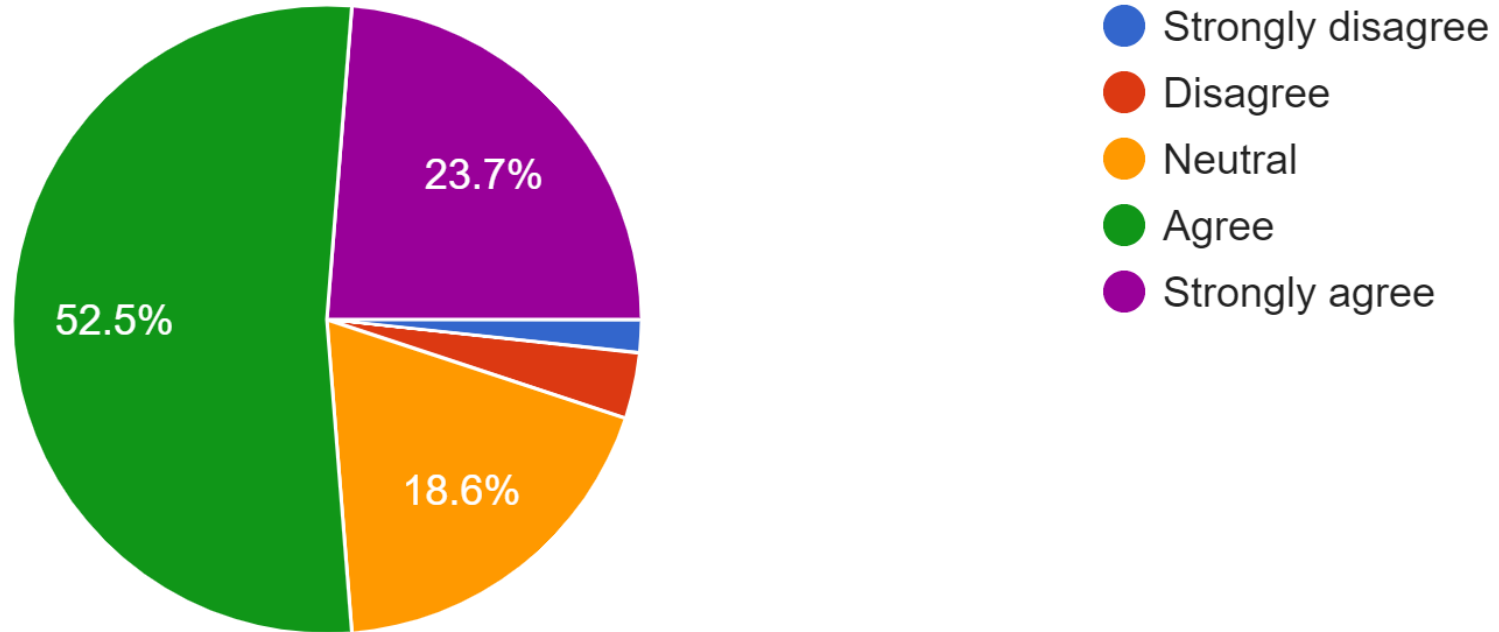

My ward is learning well through interaction with teachers of the Institute.

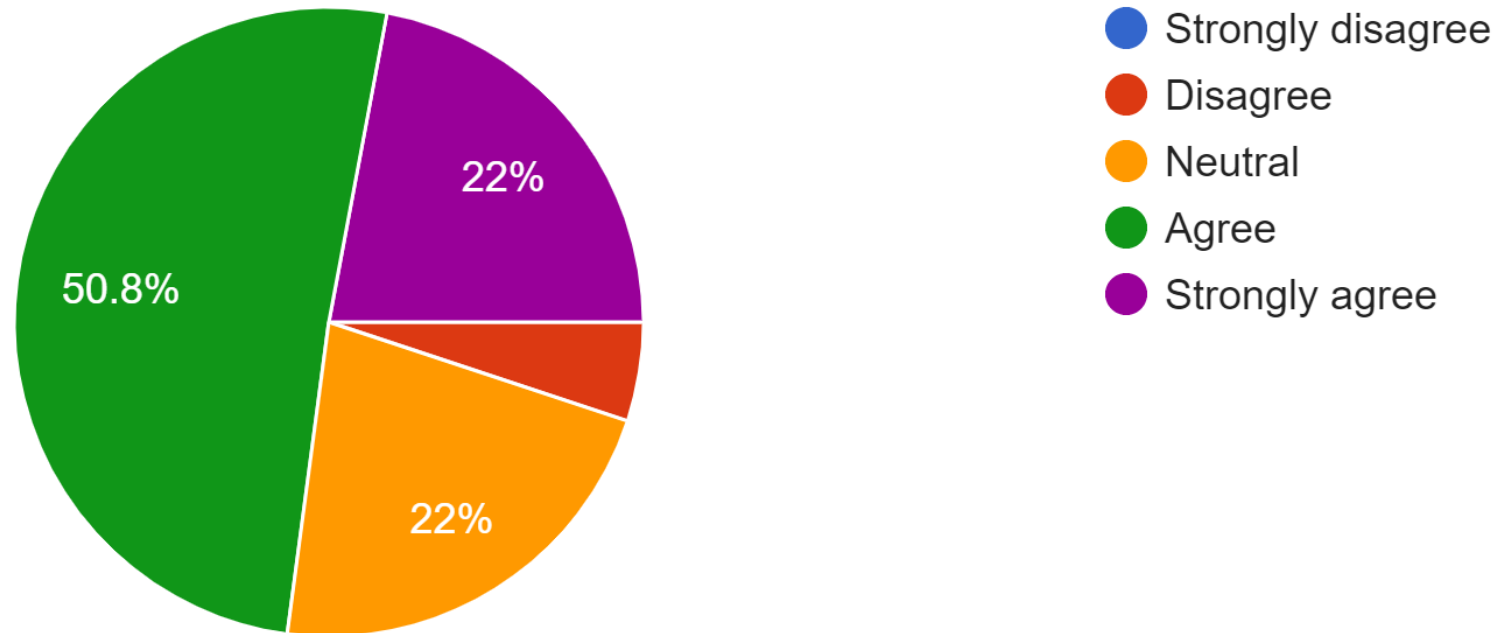

There is a positive change in the behavior of my ward after joining the Institute.

The Institute employees are cooperative.

The changes introduced in the Institute in recent years are progressive.

Please give your suggestions for further improvement in the quality of the institute:

- Though I am quite happy with the institution, the intent of following comments is to help it become even better. I wish to see it among the best not just in India, but in the world. Look forward to provide constructive feedback in a year or two. This institute teaches us moral duties apart from medicine. Keep it up.
- The management of the institution is wise enough to see the nitty-gritties of running the institute and the best interests of the students and can always take corrective steps to improve their day to day living in the hostel as well their academic acumen.
- It was a moment of pride when my daughter got admission in MGIMS

ACADEMICS

- Design academics to get maximum PG admissions of our wards
- Communication, written and verbal should be provided to those students from rural or deprived background. They can certainly use the skills to further their careers in serving the communities.
- Further increase research opportunities to increase institute standing. More high quality research can come out of the institution.
- Most important teaching should be more practical based, clinical diagnosis based.
- To create an emotional bond between students and faculties
- Along with university exams some focus should be given on PG entrance exams too.
- IT and Digital technology use in medical exposure will be an added strength. I can volunteer to give such lectures too.

Please give your suggestions for further improvement in the quality of the institute:

- INTERCOLLEGIATE PROGRAMMES

- More interaction with other colleges and institutions through events and programs.
- There can be more inter-college interactions and other activities
- Inter college exchange program with other state or international University will give additional exposure to students.

- HOSTEL FACILITIES

- Food in the mess should be operated by student cooperative committees. ,Food quality of mess should be checked regularly,
- For safety of the students and since modern technology is available CCTV if possible should be installed in the hostel. (This is only suggestion and not necessarily required. College is giving best facilities).
- I think a new boys hostel like 1st year is needed now
- Male students should also have an end time, just like the female students of this institute have. Not only will it be a HUGE STEP TOWARDS GENDER EQUALITY but also will help in ENSURING THE SAFETY OF THE STUDENTS.

LIBRARY

- Start Library 24hours

Please give your suggestions for further improvement in the quality of the institute:

- INFRASTRUCTURE

- Face lifting buildings and improving ambience in hostels.
- Robotics lab and AI setup is recommended in addition to your excellent infrastructure.

- COMMUNICATION

- Parents teacher meeting every 6 months
- Please provide the official information about the exams, fees, and other conditional rules regarding the new curriculum of exams directly to parents and also students mail ID.
- College should provide overall progress of ward to parents about academic, extra curricular activities, social behaviour .

- SPORTS

- Sports and facilities are poor, and can be improved very significantly to encourage overall well being (mental and physical) of students.
- Please support sports too the way you support academics
