

MAHATMA GANDHI INSTITUTE OF MEDICAL SCIENCES, SEVAGRAM

ACHIEVEMENTS WHICH LED TO INSTITUTIONAL EXCELLENCE

Despite being located in a rural area, Kasturba Hospital and MGIMS are at par with the best hospitals in the country with state-of-the-art facilities.

MGIMS emerged as an exemplar of social accountability. It was recognized as a socially accountable institution by the Network for TUFH (Towards Unity For Health). MGIMS was not only among the ten institutes globally who were certified—but the only institute in India to win this award.

Right from its inception MGIMS has traditionally operated on core principles of equity, social justice, and participation. The panel was impressed the way MGIMS integrates social accountability in its mission; engages, partners and responds to the needs of rural communities; advocates equity in education; conducts research relevant to population health needs and strives to improve the quality of health of the population it serves—especially those who are marginalized, vulnerable, and underserved.
